Support Nursing Science!

Please join ENRS in supporting nursing research scholars in all stages of their careers as well celebrate #GivingTuesday and the tradition of generosity. As you consider your year-end giving, we hope you will remember the impact that ENRS through our vision to promote health through nursing science has had in your life and consider donating to one of our funds below. Visit http://communities.enrs-go.org/donate-enrs for details.

- **Conference Travel Scholarships** give opportunities to undergraduate, Master and Doctoral students to attend our Annual Scientific Sessions.
- **The President’s Circle Award** helps fund collaborative partnership driven innovative research between academic and practice settings.

Planning is in full swing for our new **full two-day** Scientific Sessions from March 26-27, 2020 in Boston, MA! Thank you to all of those who submitted abstracts and to the reviewers that so carefully ensure that the best and most timely research is presented. The Conference Planning Committee, led by President-Elect and Conference Chair Dr. Ann Marie Mauro, has put together a terrific program featuring Keynote Speaker, Suzanne Miyamoto, PhD, RN, FAAN, Chief Executive Officer, American Academy of Nursing; a plenary panel of experts in health equity and health policy moderated by Past ENRS President and University of Massachusetts Boston’s Associate Dean for Academic Affairs, Rosanna F. DeMarco, PhD, RN, FAAN and concurrent workshops that will bring our theme *The Revolutionary Power of Nursing Science: Health Equity, Policy, and Practice* to life.

As president of ENRS I am privileged to serve as a member of the Leadership Council for the Council for Advancement of Nursing Science (CANS) again this year. ENRS partners with the American Academy of Nursing and the academy’s nursing science scholars. The Council and the members of CANS represent strong voices of nurse scientists at the national and international levels and are the collective voice of nursing research in collaboration with so many outstanding supporters of nursing. The recent **CANS Advanced Methods Conference: The Expanding Science of Sensor Technology in Research** was held in October in Washington, DC featuring a keynote by Past ENRS President and Beatrice Renfield Term Professor of Nursing, Yale University, Nancy Redeker, PhD, RN, FAHA, FAAN; focused on how sensor technology provides many opportunities for nursing science. It was outstanding!

Our members have exceptional talent that transforms nursing research and promotes health through nursing science. Congratulations to the recent American Academy of Nursing 2019 Class of New Fellows from our region: Susan DeSanto-Madeya, PhD, MSN, RN, CNS, Sherry A. Greenberg, PhD, RN, GNP-BC, FGSA, FAANP, Donna M. Hallas, PhD, RN, PCCNP-BC, CPNP, PMHS, FAANP, Susan A. Kelly-Weeder, PhD, FNP-BC, FAANP, Ruth Ann McDermott-Levy, PhD, MPH, RN, Barbara J. Patterson, PhD, RN, ANEF, Nancy M. H. Pontes, PhD, RN, FNP-BC, FNAP, Arlene Smaldone, PhD, CPNP-PC, Charlotte Thomas-Hawkins, PhD, RN, Robin Toft Klar, DNS, RN, Launette Woolforde, EdD, DNP, RN-BC and Jennifer Yost, PhD, RN.

Best,

*Victoria Vaughan Dickson, PhD, CRNP, FAHA, FHFSAA, FAAN*
President, ENRS
